

NETAPP UNIVERSITY

Administration of ActiveIQ Unified Manager

Abstract

Through brief lectures, exercises, and classroom discussion you discover how to deploy and maintain an ActiveIQ Unified Manager and pair it with OnCommand Workflow Automation (WFA) data-management solution. You learn how the performance-management features of Unified Manager provide a unified approach to storage management that reduces complexity. You also learn to how to extend Unified Manager's data protection capabilities with WFA. This course can be delivered in a traditional classroom or a virtual classroom.

Objectives

This course focuses on enabling you to do the following:

- Install and maintain a Unified Manager deployment
- Use Unified Manager to monitor the health and performance of your storage infrastructure
- Categorize storage objects and implement annotation and group features
- Configure thresholds, event retention settings, and alerts, so that storage issues can be anticipated and quickly identified
- Explore reporting tools and run reports
- Pair Unified Manager with Workflow Automation (WFA) to manage protection relationships and storage objects in the storage infrastructure

Prerequisites

- ONTAP Cluster Administration
- NetApp Data Management Fundamentals

Delivery Type

Instructor-led training (ILT) or
Virtual instructor-led training (VILT)

Duration

Two days

Audience

NetApp employees, partners, and
customers

Training Units

24

Language

English
